

平成29年1月6日

九州工業大学  
ディペンダブル集積システム研究センター (DISC)  
**特別講演会のご案内**

日時: 平成29年1月23日(月) 14:40~17:00

会場: 九州工業大学 飯塚キャンパス (福岡県飯塚市川津 680-4)  
Global Communication Lounge (福利施設 1F)

講師: Prof. Amlan Chakrabarti  
Dean  
Faculty of Engineering and Technology  
Professor & Director  
A.K. Choudhury School of I.T.  
University of Calcutta, India

題目:

14:40-15:40 **Data Analytics for IoT**

Internet of Things (IoT) includes anything and everything that is connected to the internet and able to communicate and share information. Insights can be extracted through analytics from huge volume of data generated by IoT making the information readily available and consumable by other systems and networks in real-time. Unlimited possibilities leveraging Analytics on IoT generated data envisage technological challenges in terms of embedded system design, data security and privacy and machine learning.
